DETAILED ACTION

Allowable Subject Matter

1. Claims 1-18 are allowed.
2. The following is an examiner's statement of reasons for allowance: None of the cited art teaches a method for processing data to provide a forewarning of a critical event that includes acquiring a plurality of sets of data for a plurality of channels of data from monitoring at least one physical test subject or physical process; calculating a set of channel data for a selected parameter from the plurality of channels of data; computing a renormalized measure of dissimilarity, comparing the renormalized measure of dissimilarity to a threshold for a number of occurrences to indicate a condition change in the renormalized measure of dissimilarity, detecting a simultaneous condition change in a plurality of renormalized measures of dissimilarity and providing an output, as shown in claims 1 and 10. Further, the claims produce a concrete, tangible and useful result by providing an output by which a human observer can detect the forewarning of the critical event.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
